

Practical, ultralight and versatile The new display in our family

MicroCounter is the easiest to assemble portable display in the market. It only weighs 6 kg. and may bear up to 40 kg on its working table. And the most important: it can be assembled in less than two minutes!

With MicroCounter, due to its price, you will have a better brand presence than your competitors. Like all the products of the big QuickSystems family, MicroCounter is manufactured with high quality and great resistance materials, besides being ultralight.

MicroCounter is available in seven shining colors: white, yellow, gray, red, green, blue and black and it also counts with original accessories such as brochure holders and showcase.

MicroCounter is undoubtedly an excellent alternative to work in the POP due to its lightness and low price.
