

Quick Rack

Tuesday, 29 March 2011 00:50 - Last Updated Monday, 25 April 2011 17:41

QuickRack is an innovative two-in-one display that allows you to exhibit your product and create brand awareness. Once assembled, it becomes a banner with a graphic area of 1.70 mts. high per 60 cms. width.

To exhibit your product, you only have to turn any of the four sections of the banner into position shelves, which can be adjusted in different angles to adapt to the characteristics of your products. Your image will always be present on the base and header, and as you run out of product on the shelves, you can rotate them to their original position to reinforce even more your brand presence.

Like all the products of the QuickSystem family, QuickRack is manufactured with high quality materials which stand out for their great resistance and lightness. It's available in seven different colors.

Remember that QuickRack offers you innovation and differentiation, two elements that will contribute to your brand's remembrance and reinforce your product positioning. QuickRack, the most practical, light and resistant exhibition display in the market, is another member of the QuickSystem line of products.
